6. ZJU : 1 project, 2.5 millions (excluded in total)

- Total: 6 libraries, 35 projects, about 1.5 million (1,437,881 items, medium size library?)
- Note: Item=digital objects(image files, full-text of article)

# 归纳与小结：数字说话

## Summary and findings : Starting Points

---

### Earliest Projects :

- Peking University Famous Scholars-1998
- Taiwan Old Photoes-2001

Note: “Early digitization projects include the Digital Museum of the Tamsui River, carried out in 1998 and 1999.” <http://dtrap.lib.ntu.edu.tw/DTRAP/en/index.htm> But not included in survey response.

### Since 2002, significantly increased the scale:

- Number of projects
- Size of collections (catalog records)
- Number of items or digital objects

# Earliest project-PKU Scholars:

Most of the materials are from Peking University Publication and Historic Materials Collection(北大文库). Very valuable first-hand materials such as photos, dairy, hand scripts, drawings, etc.

- Initiated in 1998 as local digitization project:
- Comprehensive data of 235 famous PKU professors, with sizable, multi-formats materials
  - Images: 3000+ pieces, master/derivative/browse
  - Full-text articles: 100+
  - Catalog records: 480+
  - Audio/video materials

Access and delivery methods (e.g., open access, campus-only, publication, or access by special permission):

The most often chose methods are Open Access and Campus Only. While.....

We think “Opening up hidden collections among PRDLA libraries is either very important or important.”

- Open Access: **12** PKU(5) NTU(5) SYSU(1), Wuhan (1)
- Partly Open Access: **1** NTU(1) (OA metadata not full-text)
- Campus-Only: **18** PKU(8) SYSU(4) Fudan(3) Wuhan(3)
- Library-only: **1** NTU (1)
- Special permission: **2** NTU(1) ZJU(1, CADAL)
- Not available: **1** Fudan (1)

# Strategies, Issues, and Viewpoints :

- Major barriers to opening up hidden special collections include:  
**We are lacking of everything, especially funding & Staffing.**
- PRDLA libraries should coordinate efforts to open up hidden collections by (select all that apply):
  - Forming an oversight committee for coordination and communication.
  - Jointly seeking funding such as government grants and foundation support. **v**
  - Working individually, but keeping each other informed.
  - Working within member libraries' geographic regions (e.g. country). **v**
  - Continuing the discussion at future PRDLA meetings. **v**

**We are open to any chances of cooperation but another “committee”**

PRDLA libraries should work together to create a shared infrastructure in the form of (rank your choices 1 to 5, with 5 being the most important):

The responses are very diversified. But a slightly stronger preference for repository at home institution with information made available to PRDLA either through a union catalog or an existing infrastructure. While it is clear less preference to have a central repository.

- A union catalog. **15** (3) (2) (5) (5)
- A central repository. **11** (2) (1) (3) (5)
- Existing infrastructure. **15** (4) (4) (2)(5)
- Repository at home institution with information made available to PRDLA member libraries. **17** (5) (5) (4) (3)

# 观察与思考

## Observation and perspectives

---

- Open or not open? A willingness of open but still keep closed.....
- Collaboration or stay alone: A willingness of collaboration but lack of actions. **more collaboration between various stakeholders and more creative production and business models, not to say industries and libraries, libraries with libraries, consortiums with consortiums, etc.**
- Discovery: a COMMON platform for searching, vs. a PRIVATE one
- Grouping: according to specialized collections or subjects

### What are important and relevant?

- Discovery: Google, Library discovery services
- Open Access as a trend: OR, OAJ, open data.....
- Rapid changes of Scholar Communication and HE
- Mobile Internet and Ubiquitous Society
